## Chapter 1. Whadda Hot Guy!

<p>Howdy Pahdnah. Mah name's BeeTeeYou.</p>  <p>Folks 'round hea say Ah'm kinda hot !</p>	<p>Mah job is to bring on the heat for ya'all.</p>  <p>Ah'm always on the move if I see a cool place to go.</p>
<p>See that thar Mr. Glass o' Water?</p> 	<p>Raht now his temperature is 62 degrees.</p> 

 <p>When I dive in, I'm so hot I heat him up.</p> 	<p>I raise Mr. W's temperature to 63°</p> 
<p>When nine o' my pals join me, the pool party really starts.</p> 	<p>If enuff o' us, get invited, we turn Mr. Cold Water into Mr. Hot Tea.</p> 
<p>So each o' mah BeeTeeYou buddies raises one pound o' water one degree.</p> 	<p>About the same heat that's in a lit match.</p> 

<p>Take a ten pound bucket o' ahce cubes, will ya?</p> 	<p>Warms up ta 42° if'n 10 x 10 = 100 of us BeeTeeYou's drop by.</p> 
<p>We BeeTeeYou's always move from where it's hot to where it's cold.</p> 	<p>We move through almost anything Solid, Liquid or Air.</p> 
<p>And we go fast through Solid, average thru Liquid, and slow thru Air.</p> 	<p>Over thar, across the Big Pond, we're known as British Thermal Units. But you can just call us BTUs.</p>
